

OIL SPILL

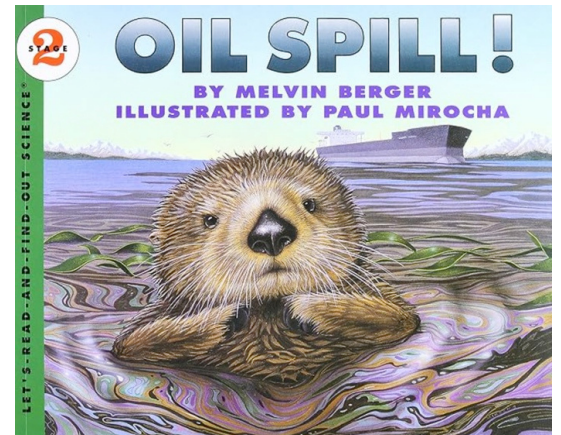

Melvin Berger

ISBN: 9780064451215

Lexile: 630L

Description: We don't always hear about it, but around the world an oil spill happens almost every single day! This book for early readers and young scientists uses beautiful illustrations to explain one of the worst oil spills in history. The book also explains to readers how oil spills happen and the implication they have in our marine life.

REFLECTION QUESTIONS

1. *What animals were harmed during this oil spill?*
2. *What are some ways oil spills can be cleaned up?*
3. *How can you help to prevent oil spills?*

ACTIVITIES

Let's all work together to prevent oil spills by using less electricity! Spread the word by talking to, calling or writing a letter to someone outside of your class to tell them how important it is to help prevent oil spills!
